

PRAVEEN KUMAR REDDY

Full Stack Developer — B.Tech Information Technology

Chennai, Tamil Nadu, India — +91 93801 10272 — kpraveenkumarreddy01@gmail.com

LinkedIn — GitHub

PROFESSIONAL SUMMARY

B.Tech Information Technology student with hands-on experience in web development and a strong interest in Full Stack Development, AI/ML, and modern software technologies. Familiar with HTML, CSS, JavaScript, React, Python, Git/GitHub, MySQL, REST APIs, and UI/UX design using Figma. Interested in building responsive, scalable, and user-focused applications and eager to contribute to fast-paced engineering teams.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, React.js, Responsive Web Design

Backend: Python, Flask, Node.js, Express.js, REST APIs

Databases: MySQL, MongoDB

Programming: Python, JavaScript, Java, C

Tools: Git, GitHub, VS Code, Figma, Postman

AI/ML: Machine Learning Fundamentals, AI Concepts, LLM APIs, Prompt-Based Workflows

Design: UI/UX, Figma, Responsive Design, Component-Based Design

PROJECTS

Centralized Learning Management System *Flask — Python — MySQL — SQLAlchemy — HTML — CSS — Git*

- Developed a centralized web-based LMS for managing students, faculty, courses, and administrative activities.
- Implemented user registration, login, password hashing, session management, and role-based access.
- Designed database models for users, faculty, and courses using SQLAlchemy and MySQL.
- Created separate dashboards for administrators and students with a responsive interface.
- Used Git and GitHub for source-code management and project version control.

B2B Product Catalog & Buyer Portal *React.js — Node.js — Express.js — MongoDB — REST API — JWT*

- Developing a responsive B2B product catalog with product search, filtering, categories, and detailed product views.
- Implementing secure authentication and buyer workflows using REST APIs and JWT.
- Developing reusable React components with a modular frontend architecture.
- Designing responsive interfaces optimized for desktop and mobile experiences.

AI-Powered Business Operations Assistant *React.js — Node.js — Express.js — MongoDB — LLM API*

- Developing an AI-assisted application to automate repetitive business operations and workflows.
- Integrating an LLM API for intelligent text processing and task assistance.
- Building a responsive dashboard with authentication and API-based workflows.
- Exploring prompt-based automation to improve productivity and reduce repetitive manual tasks.

EDUCATION

KCG College of Technology
B.Tech – Information Technology

Chennai
Expected May 2027

CGPA: 6.9 / 10

Higher Secondary Education

65%

ADDITIONAL STRENGTHS

- Strong interest in Full Stack Development and AI/ML
- Problem-solving and debugging
- Quick learner and hands-on builder
- Interested in UI/UX and design-to-code development
- Comfortable learning new technologies and development tools
- Interested in building scalable and responsive applications
